Reporting Your Evidence Workshop Exercises

1. In the grid below, create a table shell for reporting the representativeness of a sample of completers drawn from your completers. How will you structure the table to reflect the range of years covered in the self-study, the program options, and other important characteristics of your program's structure?

	l				

2.	In the space below, write a description of a method/procedure you have used or plan to use to analyze qualitative data. Imagine that the reader will then replicate the process based only on your written description. Exchange your description with a neighbor. The recipient should record any questions that remain regarding how to correctly repeat the procedure and return the description to the author.
Replica	tion Questions

 In the space below, write a description of a method/procedure you have used or plant analyze quantitative data. Imagine that the reader will then replicate the process base your written description. Exchange your description with a neighbor. The recipient sho record any questions that remain regarding how to correctly repeat the procedure and 					
	the description to the author.				
Rep	lication Questions				

3. In the grid below, create a table shell for reporting licensure data for your program's completers. How will you structure the table to reflect the range of years covered in the self-study, the program options, and other important characteristics of your program's structure?
